

Stephanie Turner...Technology...remember I am not the science or math teacher

Objective/Goal:

Getting teachers/students comfortable with the NetLogo(or other apps...Google Earth, Excel ss...) program...

- Using the Molly Segee“Getting Started Guide” to start using
- Printed or share the guide from pen drive...project and have follow and try
- Language...making sure the students/teachers are familiar and comfortable with the NetLogo language...setup, creating turtles, clearing screens, turtle commands, etc.
- 2, 40 minute periods at each grade level...to go over Guide and play:
 - create turtles
 - Have turtles make a shape
 - create buttons
 - explore Models Library

When I feel students/teacher are at a comfortable level, then Math/Science teachers would use existing lessons, and work with me to try to integrate models into what they do.
